

# UNDERAGE DRINKING IN DELAWARE

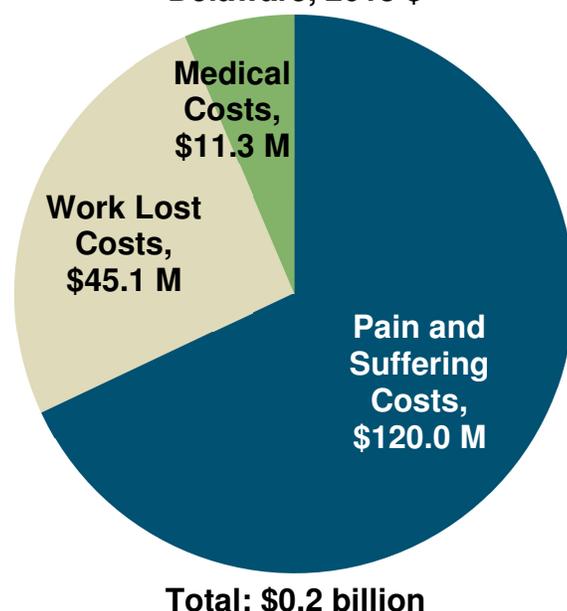

## The Facts

Tragic health, social, and economic problems result from the use of alcohol by youth. Underage drinking is a causal factor in a host of serious problems, including homicide, suicide, traumatic injury, drowning, burns, violent and property crime, high-risk sex, fetal alcohol syndrome, alcohol poisoning, and the need for treatment of alcohol abuse and dependence.

### Problems and Costs Associated with Underage Drinking in Delaware

In 2013, underage drinking cost the citizens of Delaware \$0.2 billion. These costs include medical care, work loss, and pain and suffering associated with the multiple problems resulting from the use of alcohol by youth.<sup>1</sup> This translates to \$2,058 per year for each youth in the state or \$3.67 per drink consumed underage. Excluding pain and suffering from these costs, tangible costs of underage drinking including medical care, criminal justice, property damage, and loss of work in Delaware totaled \$56.39 million each year or \$1.17 per drink. In contrast, a drink in Delaware retails for \$0.90.

**Costs of Underage Drinking Delaware, 2013 \$**

**Costs of Underage Drinking by Problem, Delaware, 2013 \$**

Problem	Total Costs (in millions)
Youth violence	\$116.3
Youth traffic crashes	\$13.3
High-risk sex, Ages 14–20 years	\$11.8
Property and public order crime	\$0.9
Youth injury	\$10.8
Poisonings and psychoses	\$2.2
Fetal alcohol syndrome among mothers aged 15–20 years	\$4.3
Youth alcohol treatment	\$0.7
<b>Total</b>	<b>\$176.4 (e.g. \$0.2 B)</b>

Youth violence (homicide, suicide, aggravated assault) and traffic crashes attributable to alcohol use by underage youth in Delaware represent the largest costs for the state. However, a host of other problems contribute substantially to the overall cost. Among teen mothers, fetal alcohol syndrome alone costs Delaware \$4 million.

In 2012, 15 youth aged 12 to 20 years were admitted for alcohol treatment in Delaware, accounting for 9% of all treatment admissions for alcohol abuse in the state.<sup>2</sup> Young people who begin drinking before age 15 are four times more likely to develop alcohol dependence and are two and a half times more likely to become

abusers of alcohol than those who begin drinking at age 21.<sup>3</sup> We did not cost these adult problems.

## Alcohol Consumption by Youth in Delaware

Underage drinking is widespread in Delaware. Approximately 33,000 underage customers drink each year in Delaware. In 2013, Delaware students in grades 9 to 12 reported the following:<sup>4</sup>

- 65.2% had at least one drink of alcohol on one or more days during their life.
- 19.8% had their first drink of alcohol, other than a few sips, before age 13.
- 36.3% had at least one drink of alcohol on one or more occasions in the past 30 days.
- 20.4% had five or more drinks of alcohol in a row (binge drinking) in the past 30 days.

In 2012, underage customers consumed 6.9% of all alcohol sold in Delaware, totaling \$43 million in sales (in 2013 dollars). These sales provided profits of \$21 million to the alcohol industry.<sup>1</sup> Ranking states based on the percentage of alcohol consumed underage, with 1 the highest, Delaware ranked number 42. This percentage is affected by both adult and youth drinking levels.

Annual sales of alcohol consumed by youth in Delaware averaged \$1,312 per underage customer. Underage customers were heavier consumers than adults. They drank an average of 4.0 drinks per day; in contrast, legal customers consumed only 2.5.

## Harm Associated with Underage Drinking in Delaware

Underage drinking in Delaware leads to substantial harm due to traffic crashes, violent crime, property crime, unintentional injury, and high-risk sex.

- During 2012, an estimated 5 traffic fatalities and 163 nonfatal traffic injuries were attributable to driving after underage drinking.
- In 2012, an estimated 4 homicides; 2,200 nonfatal violent crimes such as rape, robbery, and assault; 2,800 property crimes including burglary, larceny, and car theft; and 52,000 public order crimes including vandalism, disorderly conduct, loitering, and curfew violations were attributable to underage drinking.
- In 2011, an estimated 1 alcohol-involved fatal burn, drowning, or suicide was attributable to underage drinking.
- In 2013, an estimated 77 teen pregnancies and 2,658 teens having high-risk sex were attributable to underage drinking.

For comparison with other states, in U.S. rather than state prices, the harm from underage drinking per youth in Delaware averages \$1,328. Such comparisons require caution. In part, they may reflect differences in crime and crash rates, problem-reporting to police, and co-occurring drug use.
