

# UNDERAGE DRINKING IN MISSISSIPPI

## The Facts

Tragic health, social, and economic problems result from the use of alcohol by youth. Underage drinking is a causal factor in a host of serious problems, including homicide, suicide, traumatic injury, drowning, burns, violent and property crime, high-risk sex, fetal alcohol syndrome, alcohol poisoning, and the need for treatment of alcohol abuse and dependence.

### Problems and Costs Associated with Underage Drinking in Mississippi

In 2013, underage drinking cost the citizens of Mississippi \$0.5 billion. These costs include medical care, work loss, and pain and suffering associated with the multiple problems resulting from the use of alcohol by youth.<sup>1</sup> This translates to \$1,691 per year for each youth in the state or \$3.66 per drink consumed underage. Excluding pain and suffering from these costs, tangible costs of underage drinking including medical care, criminal justice, property damage, and loss of work in Mississippi totaled \$170.11 million each year or \$1.24 per drink. In contrast, a drink in Mississippi retails for \$0.79.

**Costs of Underage Drinking  
Mississippi, 2013 \$**

**Costs of Underage Drinking by Problem,  
Mississippi, 2013 \$**

Problem	Total Costs (in millions)
Youth violence	\$282.2
Youth traffic crashes	\$85.1
High-risk sex, Ages 14–20 years	\$44.6
Property and public order crime	\$2.0
Youth injury	\$40.6
Poisonings and psychoses	\$5.0
Fetal alcohol syndrome among mothers aged 15–20 years	\$18.1
Youth alcohol treatment	\$4.7
<b>Total</b>	<b>\$524.0 (e.g. \$0.5 B)</b>

Youth violence (homicide, suicide, aggravated assault) and traffic crashes attributable to alcohol use by underage youth in Mississippi represent the largest costs for the state. However, a host of other problems contribute substantially to the overall cost. Among teen mothers, fetal alcohol syndrome alone costs Mississippi \$18 million.

In 2012, 120 youth aged 12 to 20 years were admitted for alcohol treatment in Mississippi, accounting for 5% of all treatment admissions for alcohol abuse in the state.<sup>2</sup> Young people who begin drinking before age 15 are four times more likely to develop alcohol dependence and are two and a half times more likely to become

abusers of alcohol than those who begin drinking at age 21.<sup>3</sup> We did not cost these adult problems.

## Alcohol Consumption by Youth in Mississippi

Underage drinking is widespread in Mississippi. Approximately 105,000 underage customers drink each year in Mississippi. In 2013, Mississippi students in grades 9 to 12 reported the following:<sup>4</sup>

- 59.5% had at least one drink of alcohol on one or more days during their life.
- 23.1% had their first drink of alcohol, other than a few sips, before age 13.
- 32.9% had at least one drink of alcohol on one or more occasions in the past 30 days.
- 16.7% had five or more drinks of alcohol in a row (binge drinking) in the past 30 days.

In 2012, underage customers consumed 10.1% of all alcohol sold in Mississippi, totaling \$109 million in sales (in 2013 dollars). These sales provided profits of \$53 million to the alcohol industry.<sup>1</sup> Ranking states based on the percentage of alcohol consumed underage, with 1 the highest, Mississippi ranked number 17. This percentage is affected by both adult and youth drinking levels.

Annual sales of alcohol consumed by youth in Mississippi averaged \$1,034 per underage customer. Underage customers were heavier consumers than adults. They drank an average of 3.6 drinks per day; in contrast, legal customers consumed only 1.6.

## Harm Associated with Underage Drinking in Mississippi

Underage drinking in Mississippi leads to substantial harm due to traffic crashes, violent crime, property crime, unintentional injury, and high-risk sex.

- During 2012, an estimated 33 traffic fatalities and 399 nonfatal traffic injuries were attributable to driving after underage drinking.
- In 2012, an estimated 14 homicides; 3,800 nonfatal violent crimes such as rape, robbery, and assault; 8,200 property crimes including burglary, larceny, and car theft; and 154,000 public order crimes including vandalism, disorderly conduct, loitering, and curfew violations were attributable to underage drinking.
- In 2011, an estimated 4 alcohol-involved fatal burns, drownings, and suicides were attributable to underage drinking.
- In 2013, an estimated 396 teen pregnancies and 10,965 teens having high-risk sex were attributable to underage drinking.

For comparison with other states, in U.S. rather than state prices, the harm from underage drinking per youth in Mississippi averages \$1,219. Such comparisons require caution. In part, they may reflect differences in crime and crash rates, problem-reporting to police, and co-occurring drug use.
